# Introduction to Galaxy PROJECT

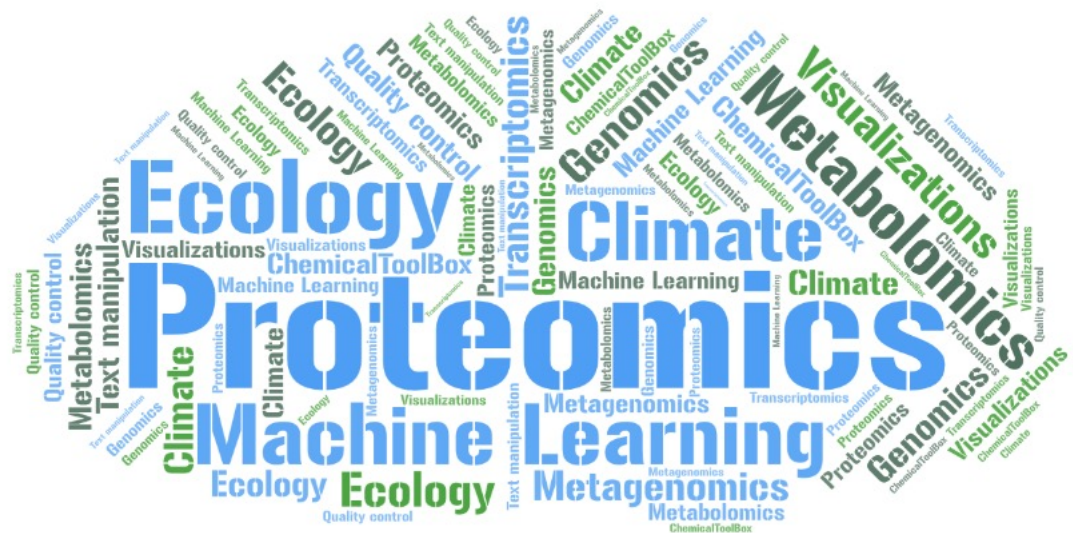

- **Web-based** platform for computational biomedical research
- Developed at Penn State, Johns Hopkins, OHSU and Cleveland Clinic
- Community driven
  
- **Open source** under Academic Free License
- More than 10,000 citations
  
- More than 125 **public Galaxy servers**
- Usegalaxy.\* instances:
  - Usegalaxy.org, usegalaxy.org.au, usegalaxy.eu

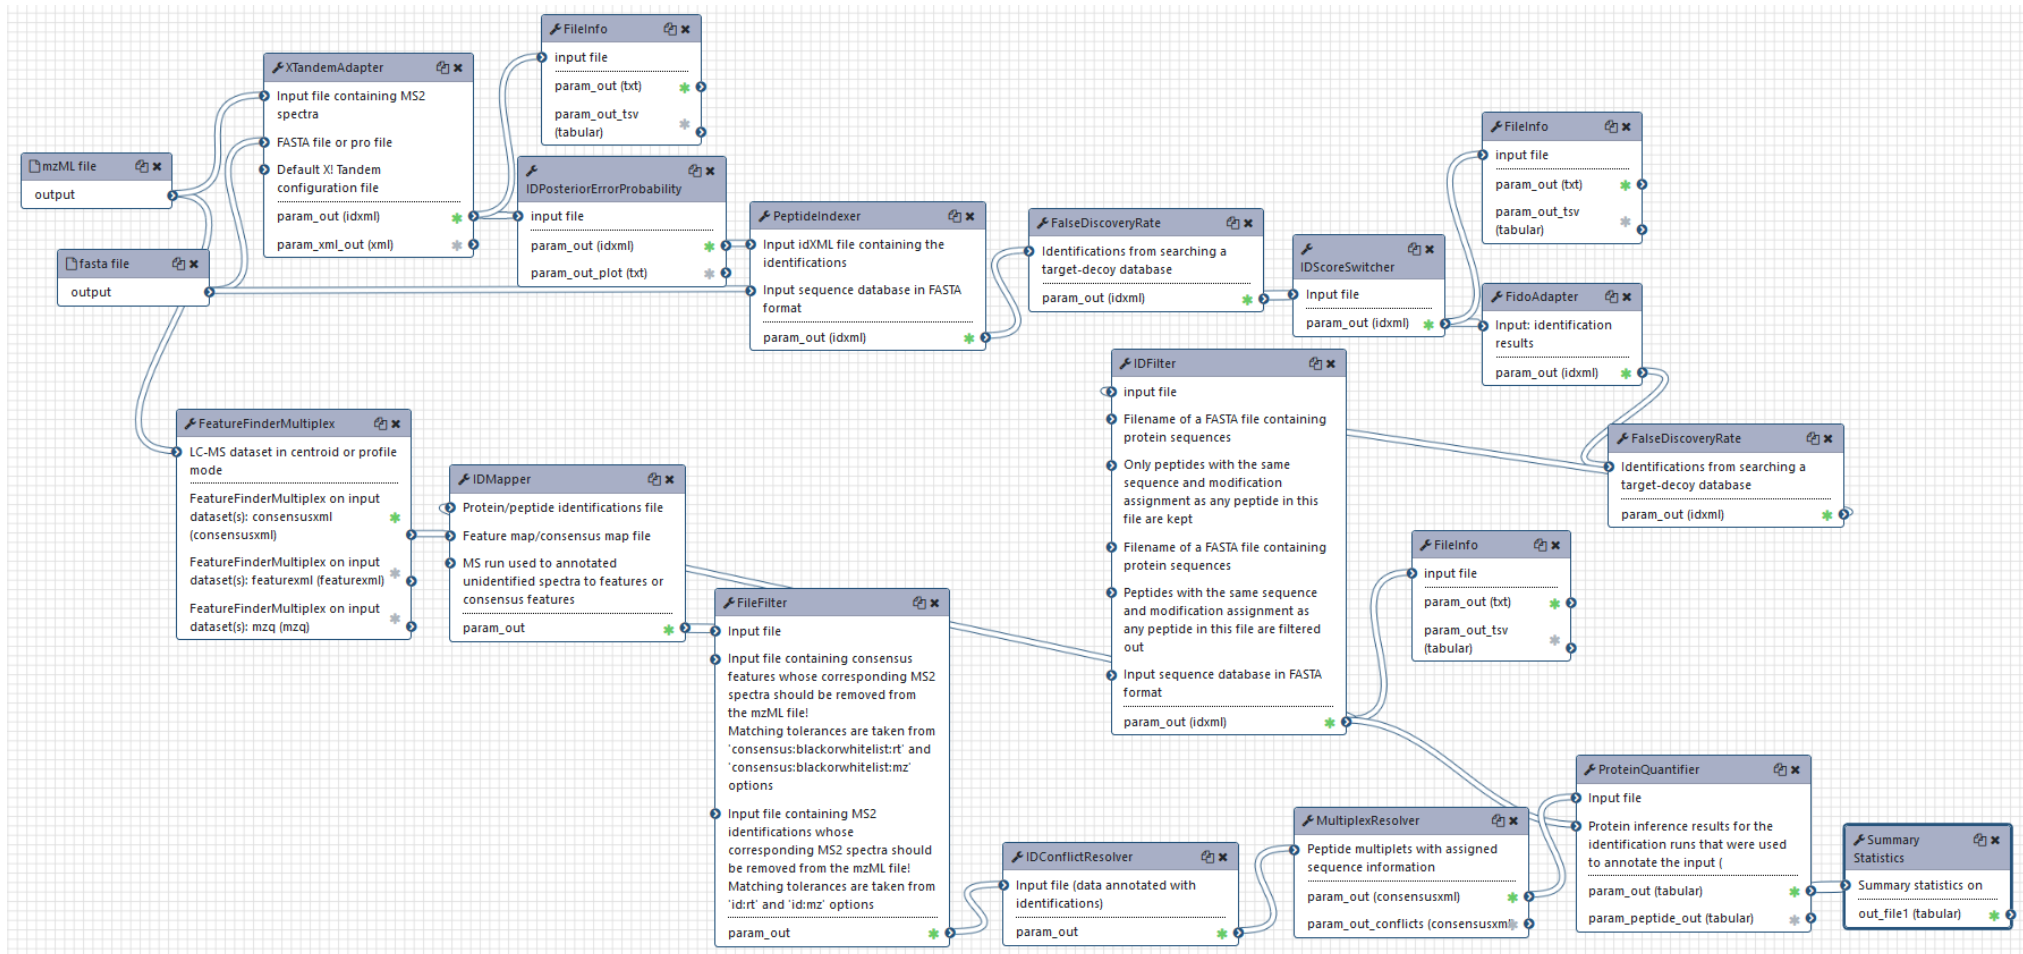

- **Accessibility**
  - Graphical user interface
  - Pre-installed tools
- **Reproducibility**
  - All information is captured in histories
  - Controlled tool versions
- **Transparency**
  - Sharing of histories and workflows

# Available tools

- Galaxy tool shed: more than 7,000 tools
- Any open source tool can be integrated
- Areas:
  - Genomics
  - Transcriptomics
  - Proteomics
  - Metabolomics
  - ChemicalToolBox
  - Statistics
  - Ecology
  - Text manipulation
  - ...

# Tools can be connected into workflows

# Hands-on training material

## Welcome to Galaxy Training!

Collection of tutorials developed and maintained by the worldwide Galaxy community

### Galaxy for Scientists

Topic	Tutorials
<a href="#">Introduction to Galaxy Analyses</a>	10
<a href="#">Assembly</a>	5
<a href="#">Climate</a>	2
<a href="#">Computational chemistry</a>	6
<a href="#">Ecology</a>	5
<a href="#">Epigenetics</a>	6
<a href="#">Genome Annotation</a>	3
<a href="#">Imaging</a>	3

<a href="#">Statistics and machine learning</a>	8
<a href="#">Transcriptomics</a>	23
<a href="#">Variant Analysis</a>	8
<a href="#">Visualisation</a>	2

### Galaxy Tips & Tricks

Topic	Tutorials
<a href="#">User Interface and Data Manipulation</a>	16

### Galaxy for Developers and Admins

Topic	Tutorials
<a href="#">Galaxy Server administration</a>	35
<a href="#">Development in Galaxy</a>	13

### How to contribute?

First off, thanks for taking the time to contribute!

You can report mistakes or errors, create more contents, etc. Whatever is your background, there is probably a way to do it: via the GitHub website, via command-line. If you feel it is too much, you can even write it with any text editor and contact us: we will work together to integrate it.

To get you started, check our [dedicated tutorials](#) or our [Frequently Asked Questions](#)

### Galaxy for Contributors and Instructors

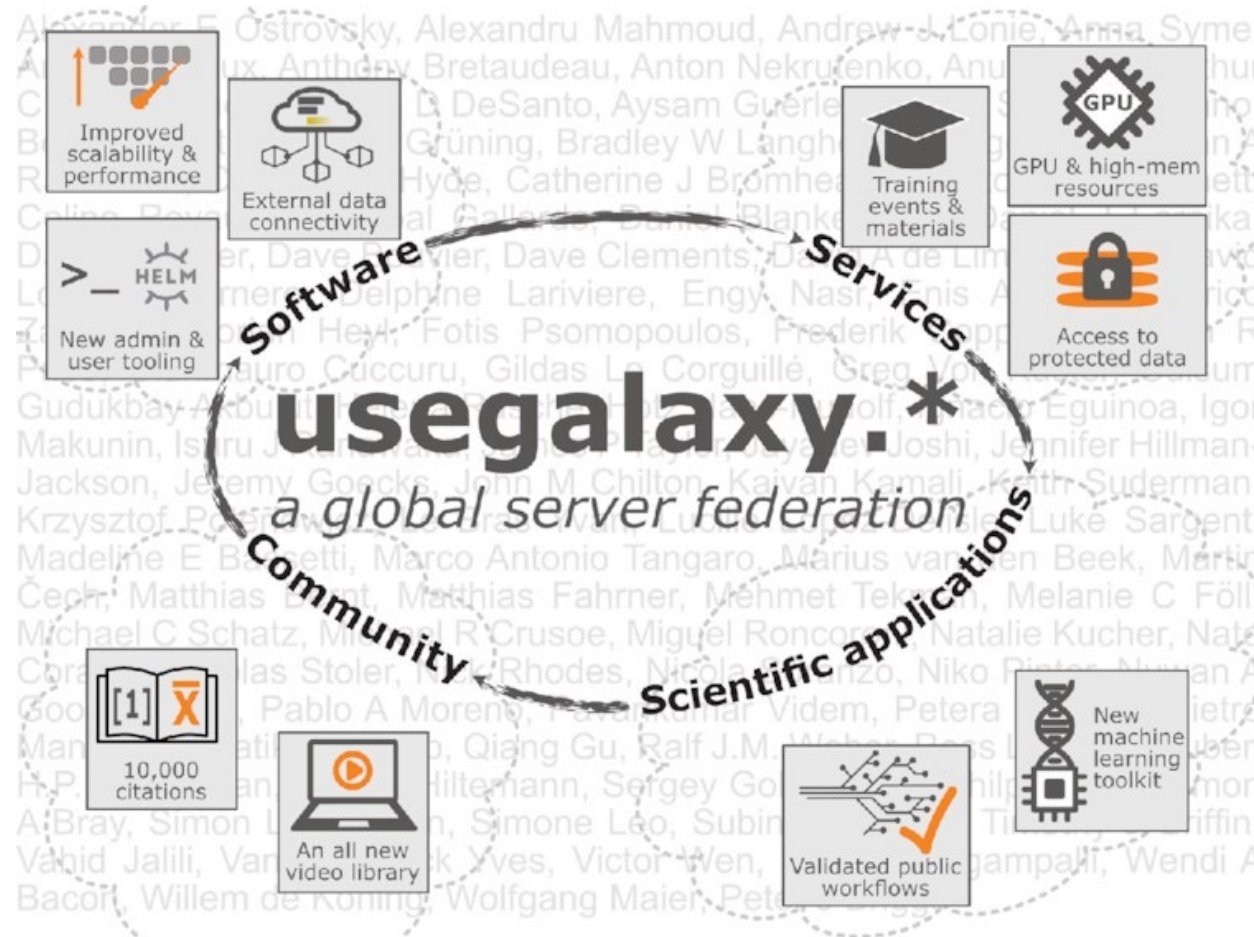

Topic	Tutorials
<a href="#">Contributing to the Galaxy Training Material</a>	10
<a href="#">Teaching and Hosting Galaxy training</a>	5

**Graphical Abstract** The Galaxy Project is represented by a combination of software, managed services, application of the software ...

# One solution: Galaxy

Goecks, J, Nekrutenko, A, Taylor, J and The Galaxy Team.. *Genome Biol.* 2010, **11**: R86.

A web-based, community developed bioinformatics workbench for integrating disparate software -- flexible

Geared towards use by bench scientists; many training resources available

Already home to genomic/transcriptomic tools

Provenance tracking, sharing and reproducibility

Amenable to other 'omic tools (e.g. Galaxy for proteomics project, Galaxy-P)

# MICROBIOME RESEARCH

## Microbiome

IN NUMBERS

**100 Trillion**

symbiotic microbes live in and on every person and make up the human microbiota

The human body has more microbes than there are stars in the milky way

**95%**

of our microbiota is located in the GI tract

**150:1**

The genes in your microbiome outnumber the genes in our genome by about 150 to one

The surface area of the **GI tract** is the same size as 2 tennis courts

**>10,000**

Number of different microbial species that researchers have identified living in and on the human body

You have **1.3X**

more microbes than human cells

**2kg**

The gut microbiota can weigh up to 2Kg

Interfacing Food & Medicine

The microbiome is more medically accessible and manipulable than the human genome

**90%**

It is thought that of disease can be linked in some way back to the gut and health of the microbiome

**5:1**

**Viruses:Bacteria** in the gut microbiota

**2.5**

The number of times your body's microbes would circle the earth if positioned end to end

Each individual has a unique gut **microbiota**, as personal as a fingerprint

# MICROBIOME

Image from <https://thedoctorweighsin.com/what-everyone-should-know-about-the-infant-microbiome/>

Potential to unravel the mechanistic details of microbial interactions with host / environment by analyzing the functional dynamics of the microbiome.

**METAGENOMICS**

**TAXONOMY**

function

**METATRANSCRIPTOMICS**

**TAXONOMY**

**function**

**METAPROTEOMICS**

**TAXONOMY**

**FUNCTION**

# METAPROTEOMICS

Bond and Wilmes 2004

“The large-scale characterization of the entire protein complement of environmental microbiota at a given point in time”

*Environ. Microbiol.* 6, 911–920.

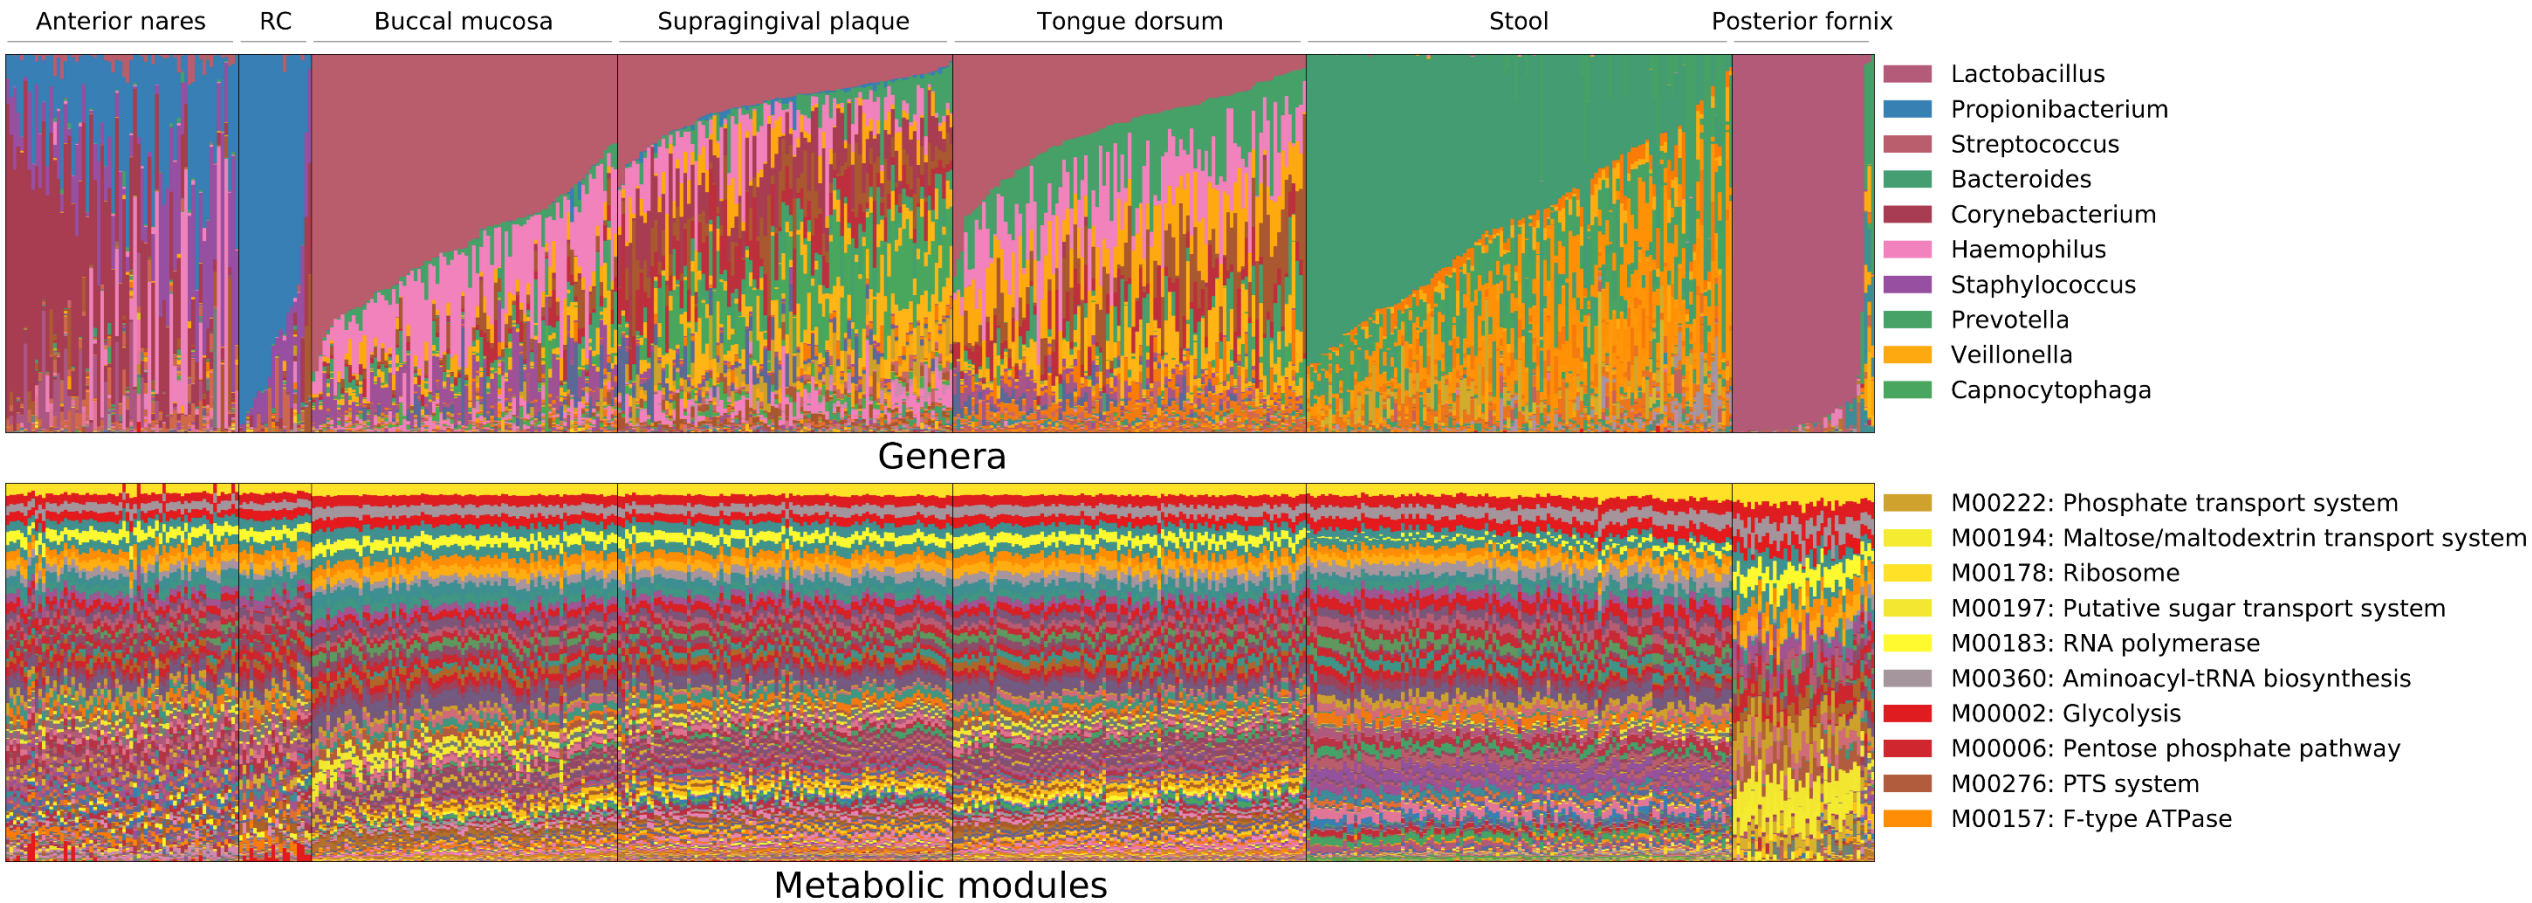

Bond and Wilmes 2015

“Through the application of metaproteomics to different microbial consortia over the past decade, we have learnt much about key functional traits in the various environmental settings where they occur.”

*Proteomics.* doi:10.1002/pmic.201500183.

# MICROBIAL TAXA VARY WHILE METABOLIC PATHWAYS REMAIN STABLE WITHIN A HEALTHY POPULATION

**Human Microbiome Project Consortium (2012). Nature. 486(7402):207-214. doi: 10.1038/nature11234.**

# METAPROTEOMICS ANALYTICAL CHALLENGES

## SINGLE-ORGANISM PROTEOMICS

## METAPROTEOMICS

### SEARCH

### DATABASE SIZE

SMALL TO MEDIUM SIZE (10 K  
TO 100K SEQUENCES)

SINGLE + CONTAMINANTS

LARGE (1 MILLION AND ABOVE)

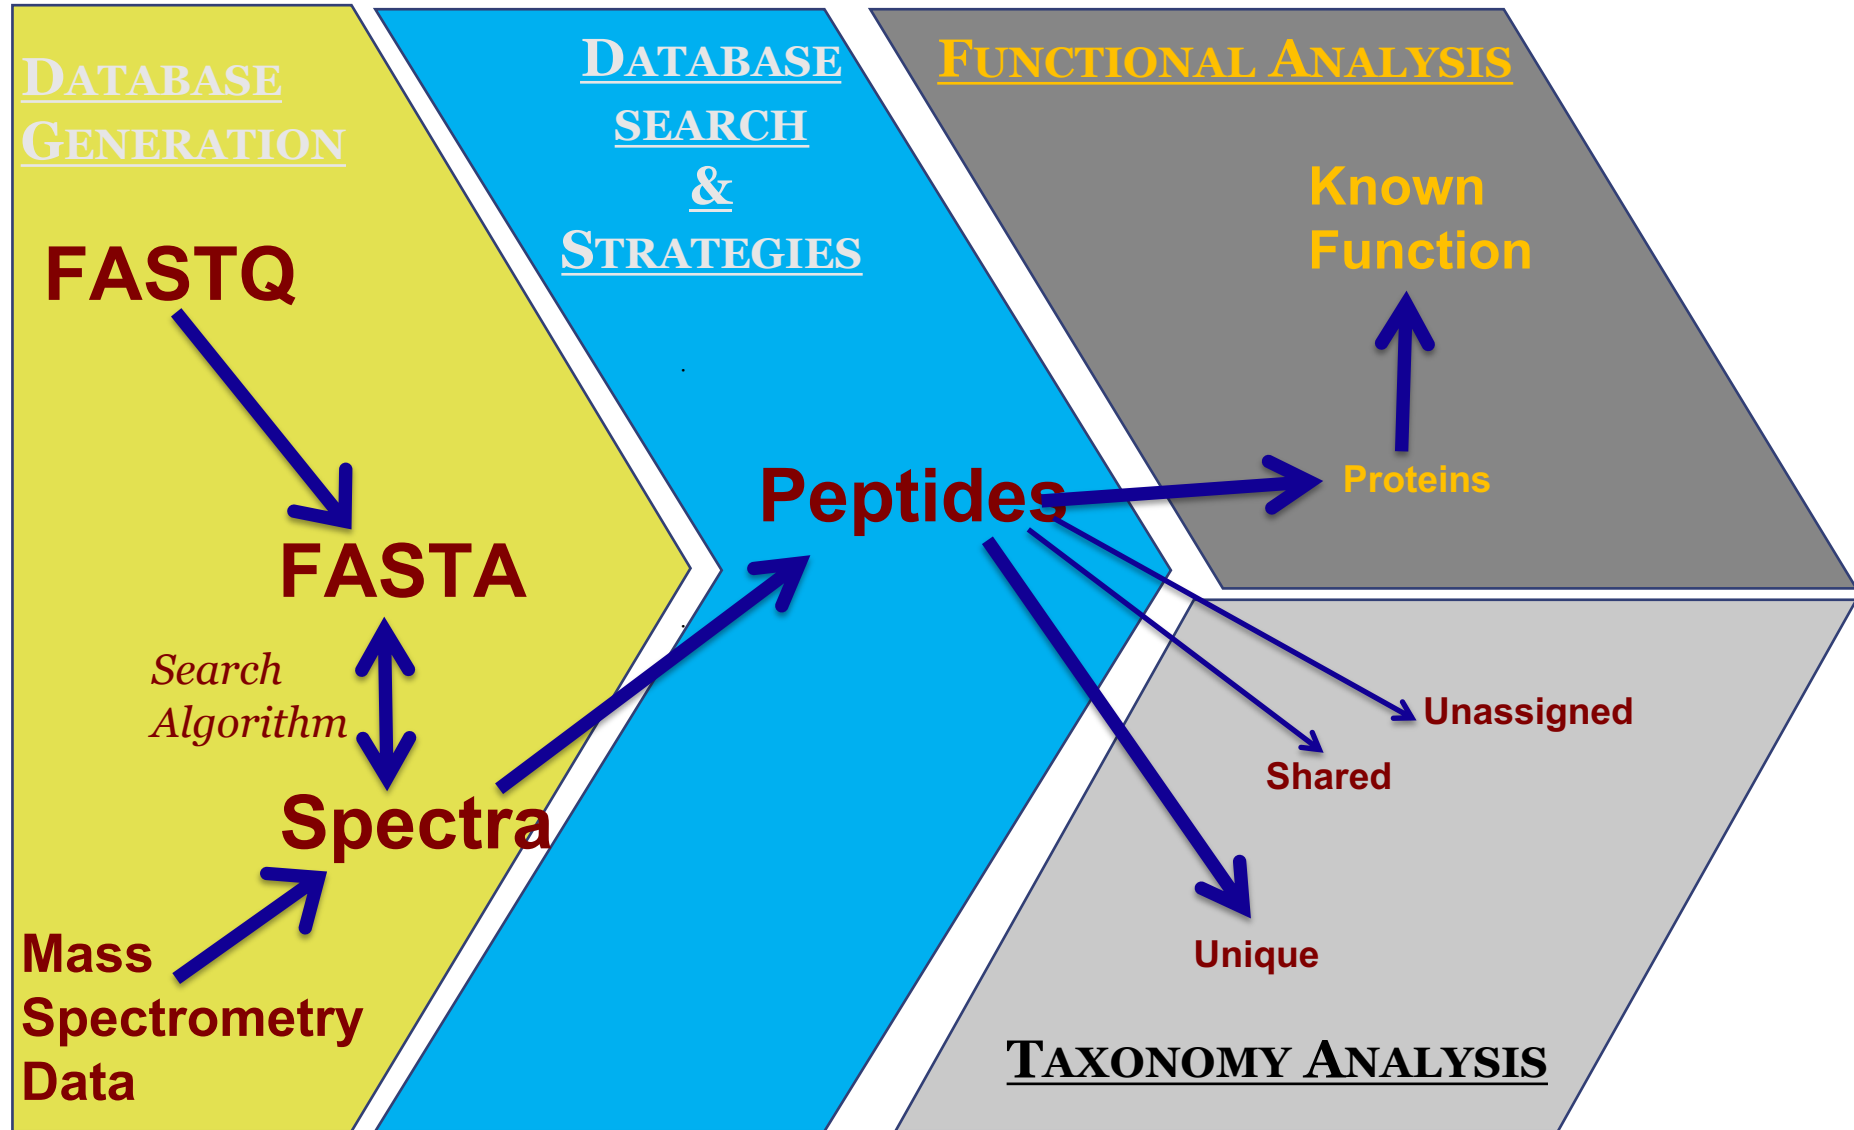

MULTI-ORGANISM DATABASE WITH HOMOLOGOUS  
PROTEINS

### COMPLEXITY

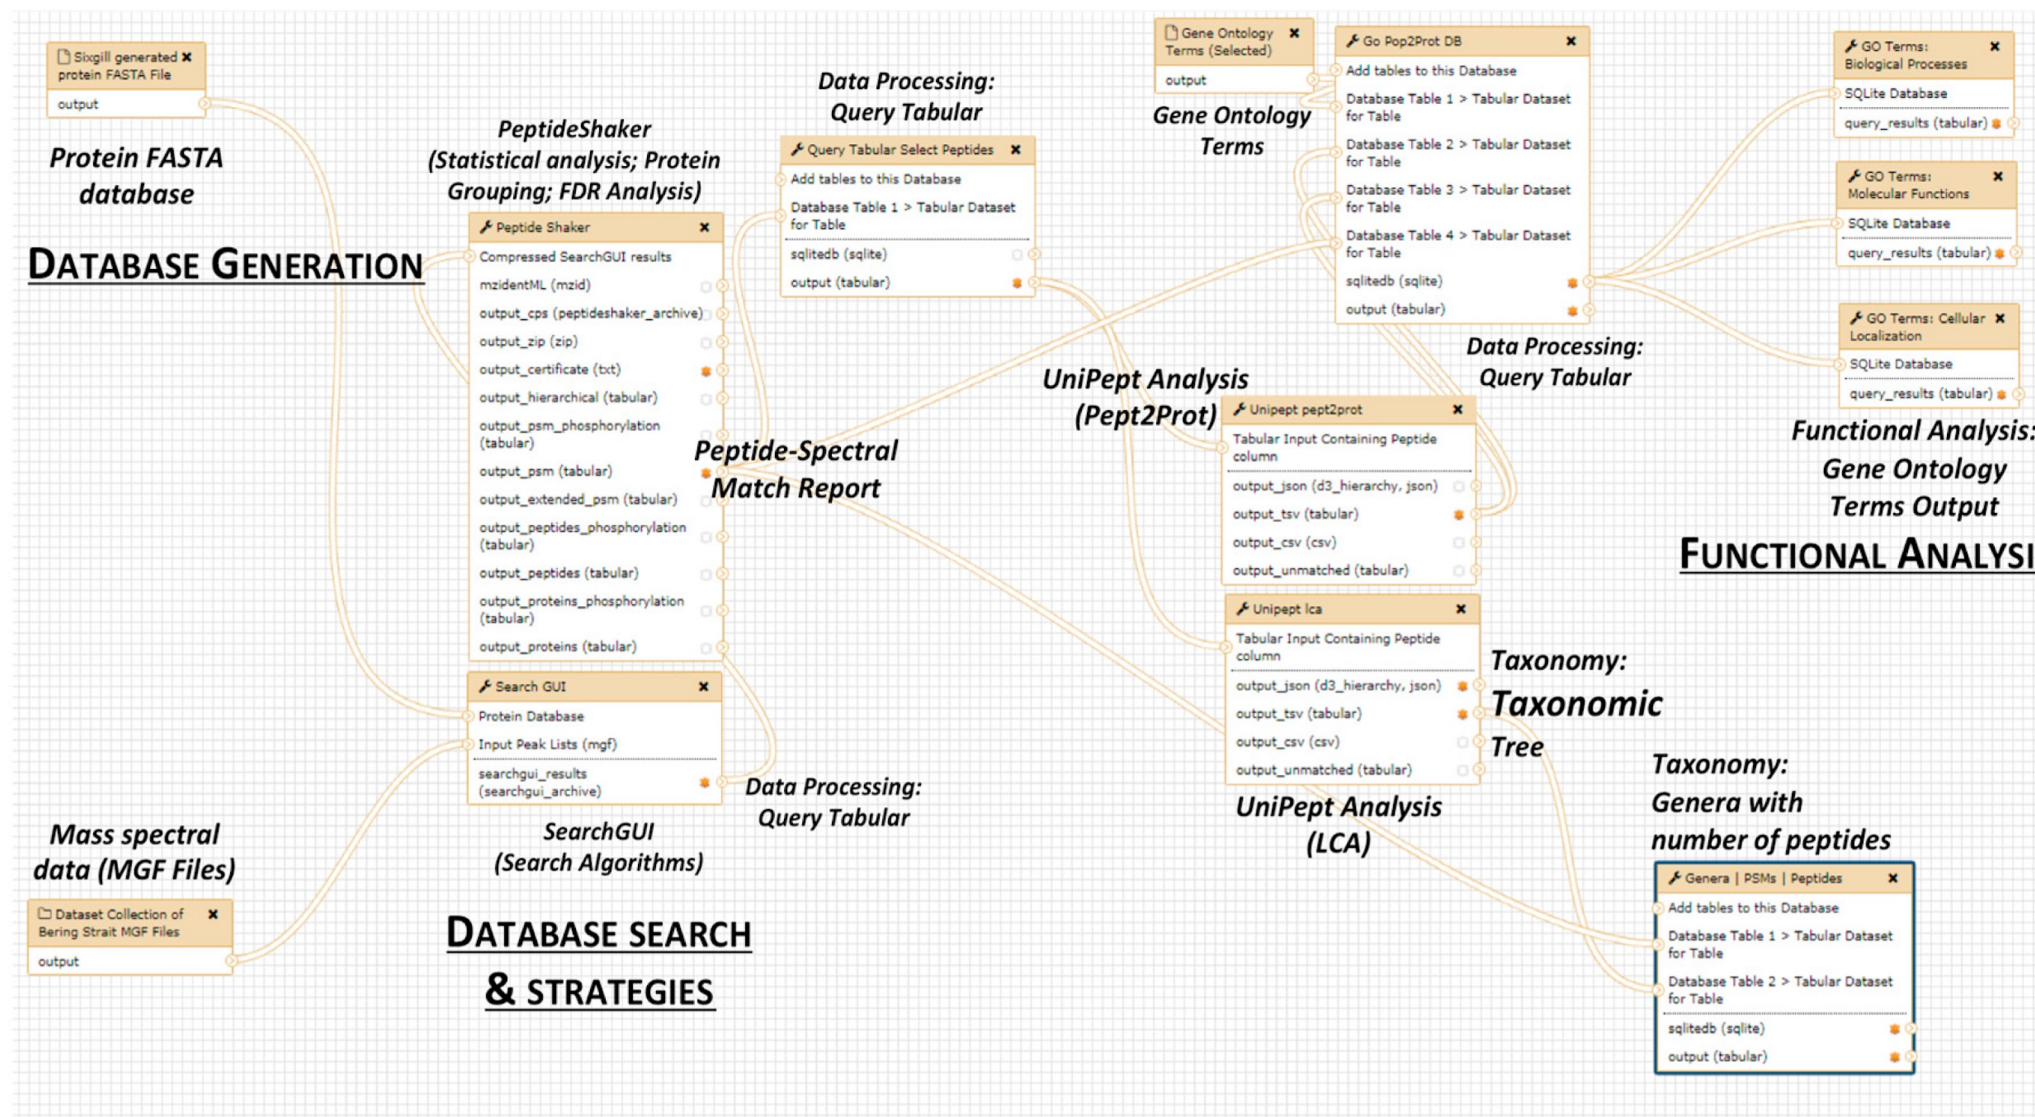

Disparate tools and  
multiple processing  
steps.

- SEARCH ALGORITHMS BEING DEVELOPED TO ADDRESS LARGE AND COMPLEX DATABASE SEARCHES
- PROTEIN GROUPING AT MULTI-ORGANISM LEVEL
- IDENTIFICATION STATISTICS AFFECTED BY LARGE DATABASES
- TAXONOMY BASED ON UNIQUE PEPTIDE IDENTIFICATIONS
- FUNCTIONAL ANALYSIS BASED ON PROTEINS IDENTIFIED

# METAPROTEOMICS WORKFLOW

# SOLUTION: GALAXY BIOINFORMATICS PLATFORM

## FUNCTIONAL ANALYSIS

**Software tools can be used in a sequential manner to generate analytical workflows that can be reused, shared and creatively modified.**

# Metaproteomics Publications

PROTEOMICS

# ANALYSIS OF FUNCTIONS EXPRESSED BY MICROBIOMES

Online Workshop (15-24 November 2021) Hosted by [CSIR-IMTech](#), Chandigarh and [Galaxy-P Team](#), Minneapolis

## ANALYSIS OF FUNCTIONS EXPRESSED BY MICROBIOMES

Online Workshop

15-24 November 2021

Funded by American Society of Microbiology (ASM) and Indo-United States Science and Technology Forum (IUSSTF).

Hosted by [CSIR-IMTech](#), Chandigarh and [Galaxy-P Team](#), Minneapolis.

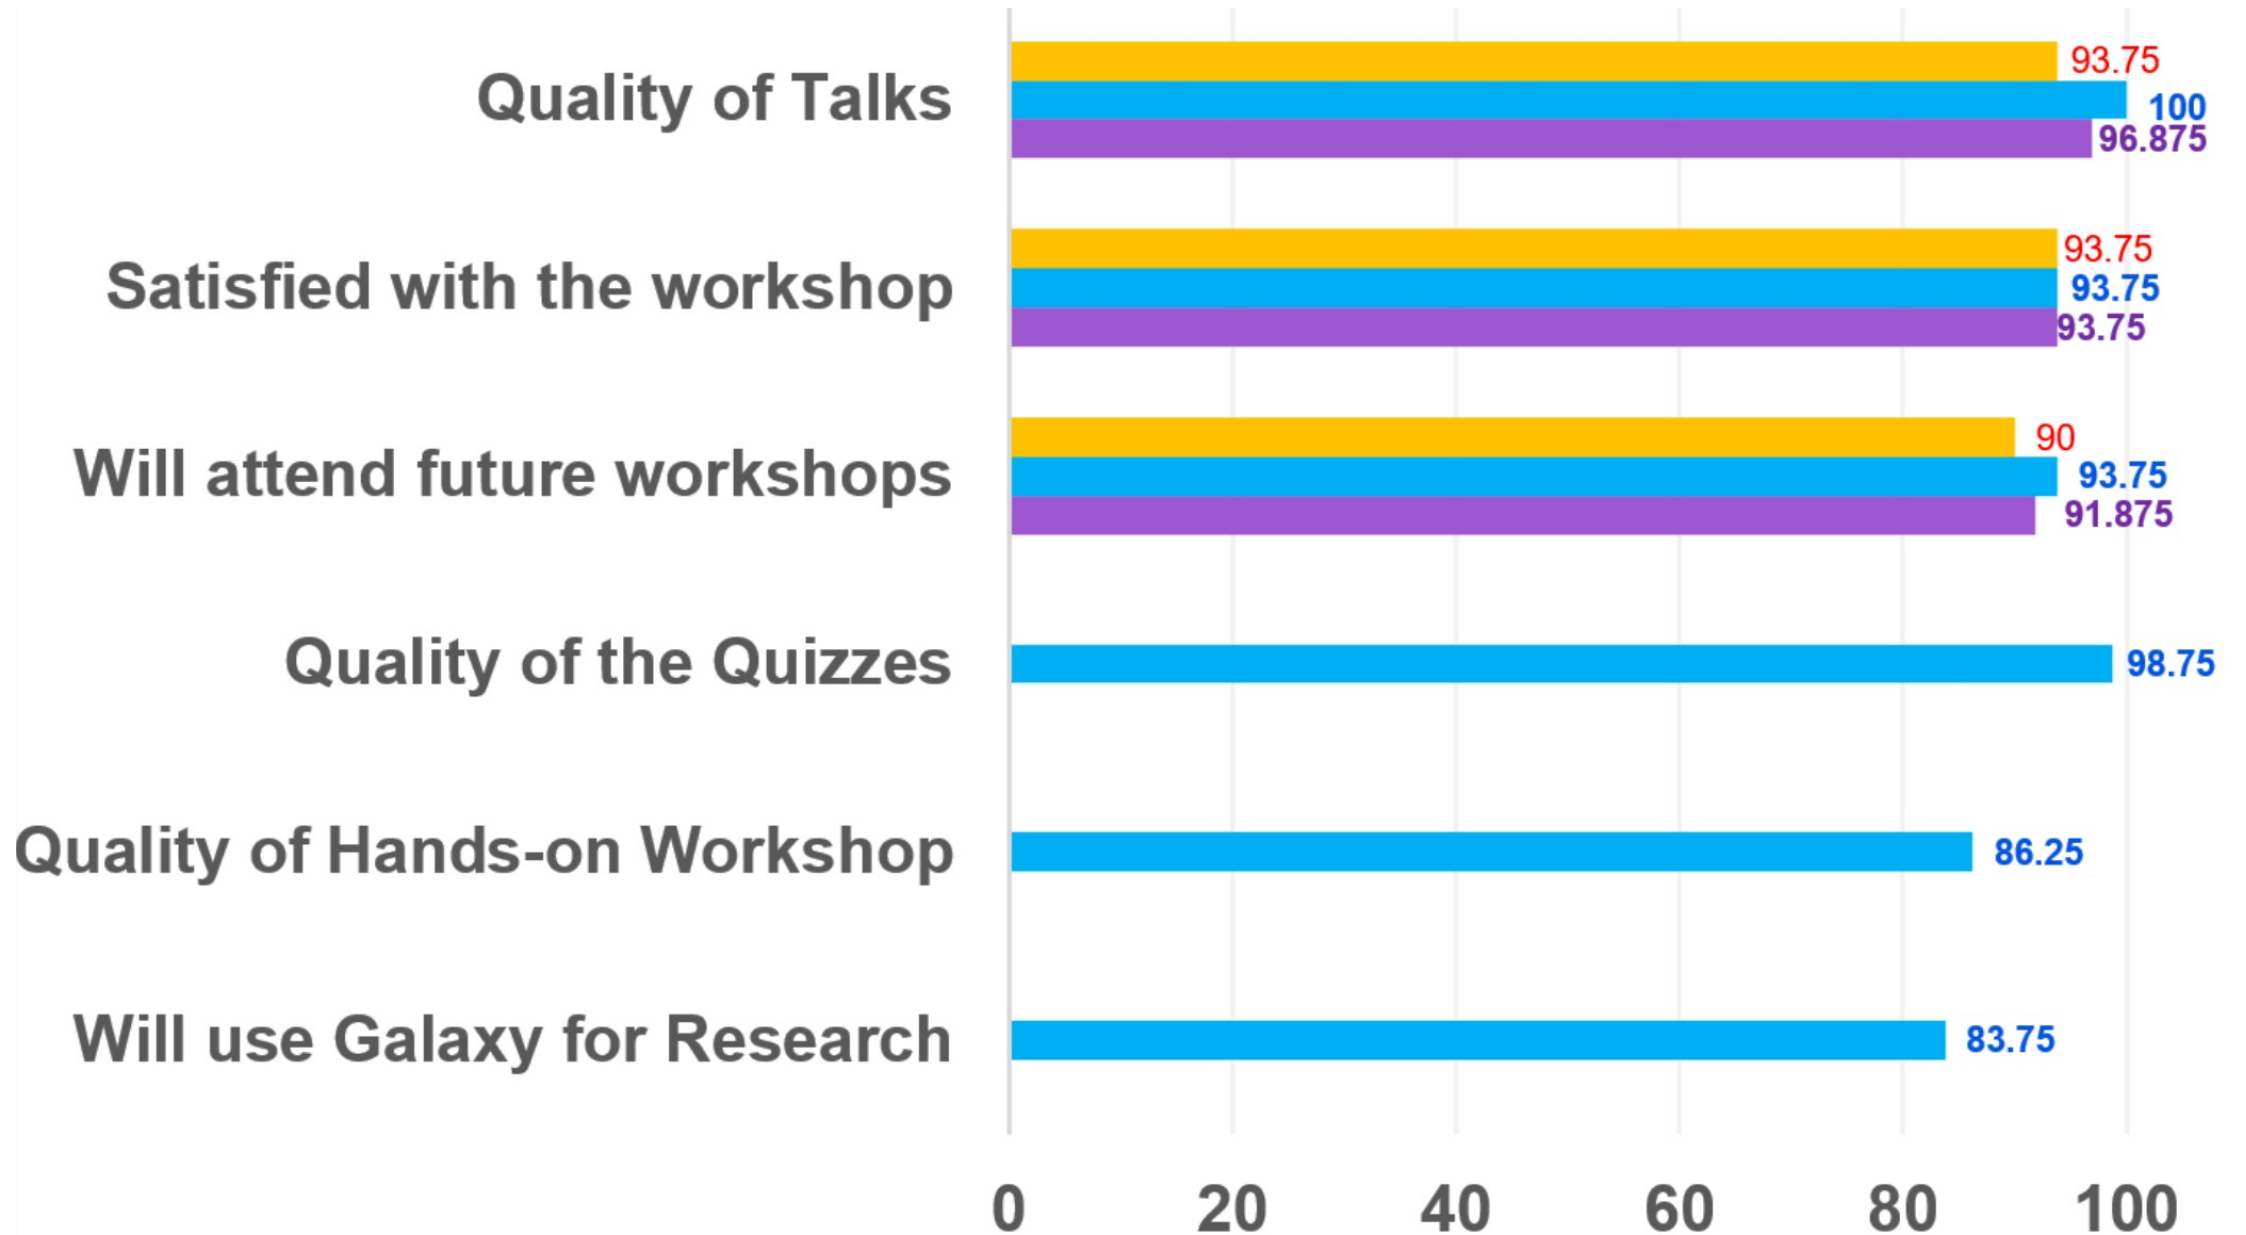

<https://galaxyproject.org/events/2021-11-microbiomes/home/>

<https://gallantries.github.io/galaxy-workshop/events/functional-microbiome-2021/>

# ANALYSIS OF FUNCTIONS EXPRESSED BY MICROBIOMES

Online Workshop (15-24 November 2021) Hosted by [CSIR-IMTech](#), Chandigarh and [Galaxy-P Team](#), Minneapolis

# Cloud Computing Workshop (2022)

The iPRG will conduct a series of online video tutorials about the use of cloud computing resources for MS-based proteomics, focusing on Nextflow, the Trans-Proteomic Pipeline (TPP) and Galaxy Platform.

## September 2022

Michael Hoopmann - *ISB, Seattle, WA*

- Instructions on how to use TPP to analyze MS data.
- Answer questions from the participants

## October 2022

Melanie Foell - *Freiburg University, Germany*

- Instructions on how to use Galaxy to analyze MS data.
- Answer questions from the participants

## November 2022

Yasset Perez-Riverol - *EBI, Hinxton, UK*

- Instructions on how to use Nextflow to analyze MS data.
- Answer questions from the participants
